— CORPORATE PROFILE —

Towards Creating a Better Global Environment and a Prosperous Society

As a member of the Nippon Light Metal Group, Nikkei Sangyo wishes to contribute to creating a prosperous society by maximizing the Group's abundant human resources and excellent technological capabilities, observing laws, regulations, and social norms, making commitments to tackling environmental issues, and providing products that meet customers' needs.

Corporate Philosophy of Nikkei Sangyo

We will share and pursue our dreams and continue to grow with the Company.

Mission of the Nippon Light Metal Group (Corporate Philosophy)

Be forever committed to the development of new applications for aluminum and aluminum-related materials and thereby contribute to the improvement of people's quality of life and environmental protection.

PRESIDENT AND CEO
Kazuyoshi Sugiyama

Message

"Challenge"

Grow yourself, and the company will grow!

Since its founding in 1949, Nikkei Sangyo has evolved and grown by creating a wide variety of businesses in response to changes in the world, thanks to the efforts of our predecessors. We will firmly inherit this tradition and continue to evolve and grow toward the future.

To that end, in this fast-changing era, we will not fear failure, will not be bound by past common sense, will thoroughly implement the 5-Gen principle (on-site, on-site, in-fact, in-principle, and in-principle) and take on challenges with down-to-earth activities, and as a member of the Nikkeikin Group, we will create value for our customers, solve social issues, and create a prosperous future as "Team Nikkeikin."

And we will continue to be grateful to the customers, local community, and related parties who support Nikkei Sangyo, and will continue to be a company that is trusted and needed by contributing to improving people's lives and protecting the global environment.

Aiming at New Proposals through Aluminum

"WE WISH TO BE COORDINATORS THAT CONTINUE TO PROSPER WITH OUR CUSTOMERS."

More than 120 years have passed since the first industrial production of aluminum.

The use of this young and promising versatile metal is exponentially growing in our society.

It demonstrates how aluminum has assumed an important role in shaping modern society and its evolvement is still attracting attention today.

We not only process and supply aluminum, but also have the primary mission to deliver products that meet a wide range of customers' needs by using everything we have, including knowledge, technology, and know-how.

1 Trading Division

Envisioning a Beautiful Future in Various Fields

» Aluminum sheets (thick/thin), aluminum double floor, etc.

Since the beginning of the 20th century, demand for aluminum has grown as use has expanded, and this has played a part in shaping modern society.

2 Aluminum Wire Division

Reliable Brand Created by Solid Technologies and Quality

» Welding wire/pack, welding rod, etc.

Our Aluminum Wire Division, the sole manufacturing division of Nikkei Sangyo, manufactures and distributes aluminum products, and plays a part in the general coordination service.

Our mission is to propose and provide high-quality products to customers in various fields.

3 Construction Engineering Division

Meeting Various Needs with Advanced Technological Capabilities

» Construction, civil engineering, housing, equipment and environment, and other businesses

The Construction Division improves the functionality of buildings, plant equipment, and lifelines, giving consideration to harmony with the environment and the people who live there from various viewpoints.

We believe this to be a requirement of the times and our responsibility for the next generation.

We will continue to be creators that always satisfy customers with the latest technological capabilities and know-how accumulated over many years.

4 Insurance Division

Providing Support for Security through Insurance

» Auto, fire, accident, medical, and other insurance

The business and living environments surrounding us are always changing and risks are also diversifying.

As insurance professionals, we provide the best products tailored to customers' needs and the highest quality services always from the perspective of customers.

* The insurance business was transferred to Nikkei Partners Co., Ltd. on October 1, 2018.

Trading Division

General Coordinator
Exploring the Future of Aluminum

» Aluminum Materials

Proposing the Best Materials to Meet Customers' Needs

Trading Division

We provide various raw materials used for products to a wide range of industrial fields. These include aluminum sheets and alloy ingots, and chemical products such as aluminum hydroxide and aluminum oxide. Our sales engineers with expertise reliably understand customers' needs.

Nippon Light Metal Co., Ltd., Nagoya Plant

» Products

»» Aluminum Hydroxide and Aluminum Oxide

Trading Division

Aluminum hydroxide and aluminum oxide, which have many excellent properties, are widely used as raw materials for flocculating agents, flame retardant fillers for rubber and plastics, ceramics, fireproof materials, grinding materials, etc. high functional materials are expected to be used for new applications in fields such as electronic materials, optical materials, and environmental materials.

»» Thick/Thin Aluminum Sheets

Trading Division

We supply high-quality aluminum sheets from Nippon Light Metal, as well as various types of aluminum sheets in various sizes from various suppliers inside and outside Japan to meet customers' needs.

»» Extruded Aluminum Parts

Trading Division

We produce complex-shaped aluminum parts by extruding a cylindrical aluminum billet using a unique aluminum processing method. We provide extruded aluminum parts in various materials and sizes, including large parts used in the Shinkansen and small parts used in IT equipment. We also provide custom services such as alumite and coating.

»» Ingots

Trading Division

We offer a variety of ingots, including pure aluminum ingots, various alloy ingots for different applications, and recycled/regenerated ingots. They can be delivered in various weights including 5 kg, 15 kg, and 25kg.

»» Aluminum Coil

Trading Division

We deliver high-quality aluminum sheets to match customers' applications and services, as well as develop new products that are ahead of the times and provide them to the world market.

»» Aluminum Scrap

Trading Division

We procure good-quality scrap that meet customers' needs from inside and outside Japan. We contribute to tackling environmental issues by taking advantage of aluminum's feature of being easy to recycle.

TOPICS

Aluminum with the World's Highest Level of Purity

Trading Division

The higher the purity of aluminum, the higher the conductivity and reflectivity. Therefore, there is demand for high purity aluminum in the electrical and electronic fields. The Nippon Light Metal Group produces high-purity aluminum with a purity of 99.9999% (6N), which is the world's highest industrial production level, to meet a variety of needs.

Takeshi Koyama, METAL GROUP

High-purity aluminum

World's First Successful Production for Industrial Use SHC5®

Trading Division

Although the existence of "sodium hypochlorite pentahydrate" has been known for a long time, only aqueous solution of about 12 wt% has been industrially available. Nippon Light Metal was the first in the world to industrialize solid sodium hypochlorite and launched a new product in 2013, under the name of SHC5®. SHC5® has higher volumetric efficiency compared with conventional aqueous solution and shows a unique reactivity.

SHC5®

Trading Division

General Coordinator
Exploring the Future of Aluminum

» Aluminum Products

Envisioning a Beautiful Future in Various Fields

Trading Division

We are aluminum specialists but also provide non-aluminum products. We propose products that match customers' needs based on our wealth of product knowledge. We also distribute a wide range of products from Nippon Light Metal group companies.

» Products

»» Aluminum Double Floors

Trading Division

Aluminum double floors for IT equipment rooms ensure high reliability and can be flexibly and easily used for a diverse range of devices and racks. We have established a mass-production technique and successfully reduced cost.

»» ALPOLIC®

Trading Division

We do interior and exterior work on buildings using ALPOLIC® aluminum and plastic sandwich panels from Mitsubishi Chemical. ALPOLIC® is very promising due to its excellent workability, beautiful appearance, and high durability.

»» Pop Rivets and Fasteners

Trading Division

As the main sales representative of Nippon Pop Rivets and Fasteners Co., Ltd., we distribute the company's pop rivets and huck bolts which provide a new fastening solution to replace screws, nuts, and welding and are useful in process automation, unmanned operation, and cost reduction. Please contact us for more information on the improvement of your fastening method.

»» BRACEREE®

Trading Division

This aluminum brace has an energy absorption function using an aluminum hysteric damper capable of reducing seismic motion in wooden houses during an earthquake to provide safety and security.

»» Sound Absorbing Spandrel

Trading Division

This spandrel is used as a finishing material for exterior and interior walls and ceilings. We offer a wealth of variations, bold designs, and a variety of colors to support your construction design and interior design. The entire production process from extrusion through to shipping provides a high-quality finish and excellent weatherability and constructability.

»» Spacer

Trading Division

This aluminum spacer provides an insulation air layer for double-insulated glass and is useful in saving energy. We can provide various sizes and types of spacers.

TOPICS

Water Supply Container Useful in Disasters

Trading Division

We have developed a water supply container useful in disasters by taking advantage of the lightweight and high corrosion resistance properties of aluminum. The foldable container has a higher holding capacity and is hygienic since an inner bag is used.

Water supply container

Masaya Sasaki,
MANUFACTURED PRODUCT DEPT

Fireproof Shed Excellent for Long-term Storage

Trading Division

We provide a reliable fireproof shed capable of storing goods for a long period of time. A type with solar power supply is also available.

Fireproof shed

Exploring the Future of Aluminum

» Aluminum Processing

Creative Collaboration Combining Technological Capabilities to Meet Various Needs

Trading Division

There are various processing techniques for aluminum to take advantage of the material.

Nikkei Sangyo with extensive knowledge of the properties of the material works together with partners with solid technologies to meet customers' various needs.

Nippon Light Metal Group Technology Center

» Processing

»» Die Casting

Trading Division

We work together with many manufacturing partners to maximize the thin-wall die casting technology. Our die cast parts are used in automobiles.

»» Forging

Trading Division

Forging is a manufacturing process to produce parts in various shapes by pounding aluminum. High strength and rigidity can be obtained. We provide a wide range of die cast parts, including automotive parts, machine tool parts, and commodity parts.

»» Casting

Trading Division

Casting is a way of forming aluminum into any shape. Stable casting quality can be achieved by appropriate melting control. We also manufacture frame parts for motorcycles which demand reliability.

»» Alumite

Trading Division

Alumite processing is a surface treatment technology unique to aluminum. Corrosion resistance and abrasion resistance are significantly increased and the beautiful appearance is maintained.

»» Cutting

Trading Division

We propose an appropriate combination of materials and cutting methods considering the application, processability, economic efficiency, etc. We also support precision cutting.

TOPICS

Extruded Aluminum Multi-Hole Flat Tube Excelling in Thermal Conductivity

Trading Division

We have developed and improved this tube which excels in thermal conductivity for use as a refrigerant tube for car air-conditioning heat exchangers.

We propose the use of a new construction method to build a large airtight structure as shown in the construction example on the right.

Takuma Kobayashi, HOKKAIDO BRANCH

Aluminum Wire Division

Producing a Variety of High-quality Products with Proven Technologies and Quality Control

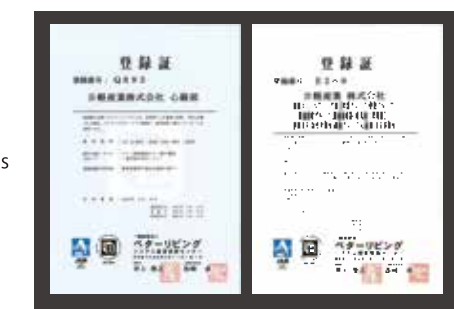

» Products

Quality Assurance System / Product Tests

We conduct strict internal tests to deliver products that meet customer specifications, various certifications, and internal standards.

Acquired Certification

- JIS certified factory
- ISO9001 / ISO14001
- Nippon Kaiji Kyokai (NK) certified product
- Lloyd's Register certified product
- Bureau Veritas (BV) certified product
- American Bureau of Shipping (ABS) certified product
- DNV GL AS certified product
- Deutsche Bahn (DB) certified product
- CE marking certified product

» Welding Wire

» Welding Rod

We remove surface pores and contaminants that cause the occurrence of blowholes with our excellent bright surface finish and cleaning technologies to obtain a sound weld joint.

We also offer a large capacity drum pack welding wire for continuous welding. Entanglement has been significantly reduced by employing a unique wire holder. excellent workability is guaranteed.

» Bundled Wire

» Aluminum Deposited Wire

We produce a variety of aluminum wire products, including a 99.999% high-purity aluminum wire and various alloy wires using manufacturing techniques developed through manufacturing aluminum welding wires. We can supply wires in forms such as spooled, bundled, and cut wire, which are used by customers in various fields, including semiconductor, automobile, and packing.

» What Are Aluminum Wires?

High Quality Achieved by Integrated Production and Sales System

Aluminum Wire Division

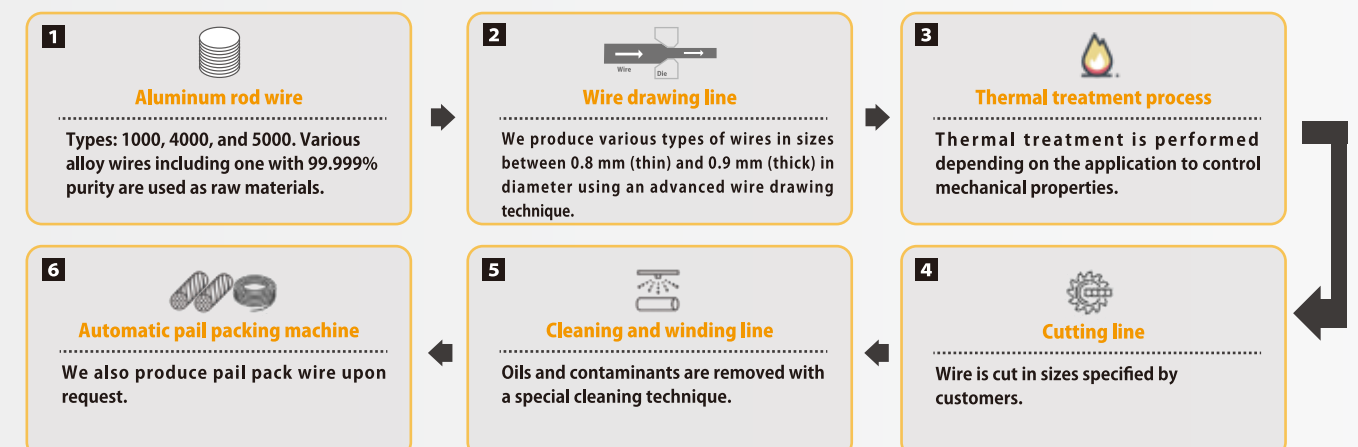

Aluminum welding joins aluminum base materials together and aluminum deposition deposits aluminum on packing films and materials. Both methods are used in a wide range of industrial fields. We produce and distribute about 200 types of wire products, including aluminum welding wire, aluminum deposition wire, and bundled wire.

Meeting Various Needs with
Advanced Technological Capabilities

» About Construction Business

Construction Group

We have accumulated know-how over many years on how to provide design and construction services that satisfy customers. We have also adopted new technologies for earthquake resistance, energy conservation, and fire prevention. We have constructed a wide range of buildings, including conventional homes, apartments, offices, plant facilities, public facilities, and shopping centers, which are of high quality. We will meet your various work needs with our reliable system.

» About Housing Business

Construction Group

We do design and construction, including wooden construction (conventional / engineering for safety (SE) construction method), steel-frame construction / reinforced concrete (RC) construction, construction of new buildings of various structures, alteration and extension work, seismic work, seismic reinforcement work (using seismic poles / conventional method, etc.), and various types of renovation work. We design a lifestyle that matches the life plan of customers under the themes of "growth, security, individuality, and family." We also propose long-term excellent homes and energy-saving homes such as those certified by ZEH and BELS. We propose affordable homes whose asset value does not fall easily.

» Construction Examples

»» Factory

Construction Group

The Construction Engineering Group constructs factories, including both small and large ones, by making the best use of its wealth of experience and technological capabilities.

»» Logistics Warehouse

Construction Group

We propose an efficient and lean logistics warehouse using our proven track record and know-how.

»» Office Building

Construction Group

We provide a comfortable office building and space to suit the business of customers.

»» Public Work (Life-long Learning Center)

Construction Group

The local facility is frequented by many citizens. We provide various technologies to suit the purpose, such as those for safety, comfort, environment, and economical efficiency.

»» Public Works (Gymnasium)

Construction Group

We provide a large facility that gives the highest priority to the safety and security of children using it.

»» Seismic Reinforcement

Construction Group

We provide a seismic program to suit the situation of each customer to protect the life and property of the customer against earthquakes.

TOPICS

House of Nikkei Sangyo

Construction Group

Considering the nature of a house, we aim at building a house fitting the climate and location, where residents can live comfortably, and a safe and secure house that can protect the family against natural disasters such as earthquakes and typhoons. We have various plans to build you a unique custom-made house with which you will be satisfied. Your suggestions are appreciated.

Message from Our Staff

Working Together with Customers
under the Themes of "Growth, Security,
Individuality, and Family"

CONSTRUCTION GROUP

Second-Class Architect
Kazuya Tsuda

Every time I meet a customer, I use my experience to propose a plan that is perfect for the customer to create a living space where the family can live happily every day. I also plan and organize events using the showrooms of manufacturers to help customers achieve a comfortable life.

Construction Engineering Division

Meeting Various Needs with
Advanced Technological Capabilities

About Civil » Engineering Business

Construction Group

Civil engineering work is essential for creating the foundation of a city where citizens can live safely and comfortably by solidifying the foundation of houses, maintaining roads and lifelines, and preventing damage from floods by dredging rivers. Based on know-how accumulated over many years, we propose a variety of civil engineering work while giving the highest priority to safety. We do a wide range of construction work, including both private and public work, in keeping with the motto of "creating a prosperous social life foundation leading to the next generation."

About Equipment » Business

Equipment and Environment Section

We do various types of machine and equipment construction work, including waste water processing equipment and waste liquid recycling equipment work, and play a part in environmental protection and natural resource preservation. We do construction work in a way that benefits customers in terms of cost reduction and safety. We continue to make proposals for what we can do now, keeping in mind environmental issues, such as how to use limited resources in order to ensure sustainable development of our society in the future.

About Electricity » Business

Electricity Section

The need for electricity continues to grow in our modern society. To prevent such a situation from occurring, daily or routine maintenance of electrical facilities and equipment is essential, in addition to proper design and construction. We are electrical engineering professionals that support customers in a wide range of design, construction, and maintenance of conventional homes, buildings, hospitals, schools, and factories.

» Construction Examples

»» Slope Work

Construction Group

We do natural disaster prevention work using our wealth of technologies and know-how in order to create a safe and comfortable environment.

»» Land Formation Work

Construction Group

We deliver satisfaction to customers by doing everything from planning, site survey, and construction keeping in mind to ensure harmony with and integration into the surrounding area.

»» LED Lighting Installation Work

Electricity Section

We install lighting equipment that consumes less electricity and is more energy efficient than conventional fluorescent lighting. We propose a comfortable space to match the size, scale, and other requirements.

»» Cubicle Installation and Electrical Work

Electricity Section

We do upgrade work for obsolete equipment such as cubicles that work as main power sources in factories. We also do other electrical work and electrical maintenance and repair work for the entire facility.

»» Alkali Recovery Equipment

Equipment and Environment Section

This equipment separates caustic soda waste solution generated in the etching process of an aluminum surface treatment line into caustic soda and crystalline aluminum hydroxide and recovers them for recycling purposes.

»» Storage Tank Upgrade Work

Equipment and Environment Section

We propose an equipment upgrade for customers who have to deal with their obsolete storage tank equipment. Our strict construction management ensures high quality.

TOPICS

Seismic Business

Construction Group

We do seismic diagnosis following the standards and guidelines of Shizuoka Prefecture as we are a construction business company located in Shizuoka Prefecture. Based on the diagnostic analysis results, we propose and conduct seismic reinforcement work that matches the structure of the buildings.

We do seismic work for a wide range of structures, including conventionally constructed homes, apartments, buildings, factories, and offices.

Seismic business work is carried out by working together with other Nippon Light Metal group companies in order to build safe and secure buildings that meet customers' needs.

Message from Our Staff

We are engaged in building constructions that gives off a relaxing and peaceful space vibes.

CONSTRUCTION GROUP

First-Class Architect
Shingo Kobayashi

Besides comfort, we are involved in seismic reinforced, earthquake resistant buildings and living spaces where you can spend a safe and secure living. We strive to deliver the pleasure of secureness to as many customers as possible.

» About Insurance Services

Insurance Division

As an insurance agent with insurance planners, Nikkei Partners Co., Ltd. provides insurance agency services by partnering with six general insurance companies and five life insurance companies in order to support the sound and solid business activities of companies and the comfortable life plan of individual customers through the insurance business.

» Available Insurance Products

»» Asset protection insurance

Fire insurance, loss of profits insurance, all risk insurance

Insurance Division

This category of insurance compensates for losses caused by property damage accidents and covers buildings, machines and equipment, home contents, and merchandise.

»» Welfare benefits insurance

Accident insurance, worker's accident comprehensive insurance

Insurance Division

This category of insurance compensates for damages caused by accidents occurring in daily life and at work.

»» Compensation liability insurance

Auto insurance, various types of compensation liability insurance

Insurance Division

This category of insurance is useful in compensating for damage caused by a car accident, injury to other persons, or damage to other persons' property.

»» Life insurance

Various types of life insurance, medical insurance, cancer insurance

Insurance Division

This category of insurance covers illnesses and injuries occurring in daily life and is also useful regarding a company's welfare benefits, efficient preparation for retirement allowance, and as a financial means.

»» INSURANCE DESIGN

We propose an economically appropriate plan by understanding the prediction of risks, accident prevention measures, and the influence of an accident.

»» CONTRACT MANAGEMENT

We properly manage insurance contracts. We ensure that the paperwork and management are carried out properly in order to be able to provide services that satisfy customers and provide peace of mind.

»» QUICK RESPONSE

We quickly provide advice from the perspective of customers. In the case of an accident, we process the accident quickly and properly to help ease the customer's mental and economic burden.
